NORTH CAROLINA LABOR FORCE ESTIMATES

1980

BY

COUNTY

DEFINED MULTI-COUNTY LABOR AREAS

STATE

MULTI-COUNTY PLANNING REGIONS

Employment Security Commission of North Carolina
Labor Market Information Division
Donald A. Brande, Employment Security Research Director

PREFACE

This release of labor force estimates for North Carolina counties is the twentieth in a continuing series. Data prior to 1970 were based on a work force (place of work) concept. Data from 1970 forward are based on a labor force (place of residence) concept. Estimates in this publication supersede all previously published data and include revisions to incorporate more current information.

The publication presents monthly labor force estimates for all counties for 1980 and annual average data for the years 1970-1980. The labor force estimates for all years reflect a breakdown of employment into major categories. Breakouts of the major manufacturing industry groups in each county are also included. Industry titles have been shortened for space purposes. A detailed industry title is shown in Appendix D.

The publication is divided into four sections. The first section includes county labor force estimates, the second section includes labor force estimates for the defined multi-county labor areas, the third section shows labor force estimates for the State, and the fourth section shows labor force estimates for the multi-county planning regions. A directory of the North Carolina defined labor areas is included on page 7 of this publication.

The labor force estimates for the State's 100 counties have been forced to add to the totals for the State. Therefore, a summation of the county estimates for total employment and total unemployment will equal the Statewide totals.

Industry employment by place of work for 1975-1980 is based on the 1972 Standard Industrial Classification (SIC) manual. Data for 1970-1974, however, are based on the 1967 SIC code structure. Therefore, data for all industry segments may not be strictly comparable.

Appendix A

EXPLANATORY NOTES

The labor force estimates shown in this publication were developed using procedures that were designed by the United States Department of Labor. The procedures are described in the Handbook on Development of Basic Labor Market Information for Small Areas, Handbook on Estimating Unemployment and other handbooks in the Labor Department's research method series.

The employment estimates in this publication were derived by segment and are summed for the total. Employment in the manufacturing and nonmanufacturing segments are derived by compiling data from all firms covered by the Employment Security Law of North Carolina, all railroad establishments, and nonprofit establishments, and government establishments not covered by the Employment Security Law. Since these data are secured from establishments, they represent employment by place of work. To provide employment estimates that are more in line with national figures, total nonagricultural wage and salary employment has been adjusted to a place of residence concept. In general, the "place of residence" estimate for an area differs from the "place of work" estimate in that an adjustment has been made to remove the effects of commuting and multiple jobholding. Persons involved in labor management disputes some time during the year are counted in the employment totals.

Employment in the agricultural segment is estimated by adjusting monthly farm employment figures compiled by the U. S. Department of Agriculture to remove dual jobholders and to reflect seasonal trends. Statewide figures are allocated to counties based on census proportions.

The estimates of "all other" nonagricultural employment are derived by relating current national trends in employment in this segment to census data and to the relative change in nonfarm wage and salary employment in an area.

Unemployment estimates are derived following the detailed methodology included in the Handbook on Estimating Unemployment. The unemployment data are conceptually comparable with those released by the U. S. Department of Labor each month for the country as a whole; however, they are developed on the basis of a different procedure. The national data are based on a sample of almost 50,000 households throughout the country. The county and state information starts with a count of persons filing for unemployment insurance benefits. To this total are added appropriate estimates for unemployed persons who have exhausted their unemployment insurance benefits and are still unemployed; persons who have delayed filing for benefits but who are not working; unemployed persons who applied for benefits but are not qualified to receive them; workers separated from industries not covered by unemployment insurance; and unemployed persons newly entering or reentering the labor force. The estimates thus include all persons who were not at work but were actively seeking work or had made specific efforts to find a job during the preceding four weeks. Unemployed persons are counted by their place of residence.

Appendix B

DEFINITION OF TERMS

Labor Area -- a geographic area consisting of a central community and surrounding territory in which there is a concentration of economic activity or labor demand and in which workers can generally change jobs without changing their residence. In North Carolina a labor area follows county boundary lines and may consist of one or more counties.

Civilian Labor Force --the total number of employed and unemployed persons, excluding military personnel.

Employment -- all persons who worked for pay or profit, or worked without pay for 15 hours or more per week in a family farm or business.

Unemployment -- all persons who did not work at all but were able, available, and looking for work. Includes all jobless persons looking for work, regardless of whether or not they qualify for unemployment insurance benefits.

Rate of Unemployment -- the number of unemployed as a percent of the civilian labor force.

Nonagricultural Wage and Salary Employment -- all full time and part time nonfarm production and non-production employees who worked in or received compensation from nonfarm establishments.

All Other Employment -- nonfarm self-employed workers, unpaid family workers, and domestic workers in private households, i.e., those nonfarm self-employed who worked for profit or fees in their own businesses, professions, or trade; unpaid family workers who worked without pay in a business operated by a member of the household to whom they are related by blood or marriage; and domestic workers in private nonfarm households.

Agricultural Employment -- all operators, managers, unpaid family workers, and other hired workers on farm establishments, including domestic workers in farm households.

SIC Code -- Standard Industrial Classification in numerical code used to categorize industrial establishments by the main activity in which they are engaged. See Appendix D for a listing of the two-digit industrial codes used in this publication.

Appendix C

BASIC DATA USED IN DEVELOPING LABOR FORCE ESTIMATES

ESC Tabulations showing employment in firms covered by Employment Security Law

Bureau of Census, County Business Patterns, for employment in firms with less than four employees for years prior to 1972

Census of Population

Farm Labor, United States Department of Agriculture

Special surveys of employment in noncovered industries, e.g., government, schools, hospitals, etc.

The U. S. Bureau of Labor Statistics for certain segments of employment

Unemployment Insurance claimant data from the Employment Security Commission and the Railroad Retirement Board

Various publications from local, state, and federal agencies showing related labor force data

Bureau of the Budget, Standard Industrial Classification Manual - 1967 and 1972, for determining industrial classification of firms

Appendix D

STANDARD INDUSTRIAL CLASSIFICATION FOR INDUSTRIES

Industry Code	Title of Industry	Shortened Title
19-39	Manufacturing	Manufacturing
19	Ordnance and accessories	Ordnance
20	Food and kindred products	Food
21	Tobacco manufactures	Tobacco
22	Textile mill products	Textiles
23	Apparel and other finished products made from fabrics	Apparel
24	Lumber and wood products, except furniture	Lumber & Wood
25	Furniture and fixtures	Furniture
26	Paper and allied products	Paper
27	Printing, publishing and allied industries	Printing
28	Chemicals and allied products	Chemicals
29	Petroleum and refining and related industries	Petroleum
30	Rubber and miscellaneous plastic products	Rubber
31	Leather and leather products	Leather
32	Stone, clay, glass and concrete products	Stone, Clay, & Glass
33	Primary metal industries	Metals Prim. Metals
34	Fabricated metal products	Fab. Metals
35	Machinery, except electrical	Machinery Nonelec. Machinery
36	Electrical machinery, equipment and supplies	Elec. Machinery
37	Transportation equipment	Trans. Equipment
38	Professional, scientific, and controlling instruments	Instruments
39	Miscellaneous manufacturing industries	Misc. Mfg.
15-17	Contract construction	Construction
40-49	Transportation, communication, electric, gas, and sanitary services	Trans., Comm., & Pub. Util.
50-59	Wholesale and retail trade	Trade
60-67	Finance, insurance, and real estate	Fin., Ins., & Real Estate
70-89	Services (excluding domestics)	Service
	Service and miscellaneous (Includes 07-14)	Service and Miscellaneous
91-94	Government	Government
07-14	Agricultural services, forestry, fisheries, and mining	Other Nonmanufacturing
